REMARKS

RETURN TO CIA
LIBRARYSOURCE 25X1X

Between 12:30 and 3 p.m. on 8 December 1951, Alt Loennewitz airfield was observed from its eastern, southern, and northern sides. There was a cloud base of about 3,000 meters and visibility was limited to about 15 km. A covered MiG-15 without auxiliary fuel tanks was in front of the third hangar from the east. The hangars were closed. There was no flying. No change was observed at the radio installation all of which were occupied. Six to eight railroad tank cars were observed on the spur track in the northern section of the field. There was vehicular traffic near the hangars. No other activity was observed. *

25X1A

* Comment. Alt Loennewitz airfield was not occupied by an air unit on the day of observation. Another source observed a new fighter unit in Alt Loennewitz on 14 December 1951. From the type of flying observed by this source the unit probably had new flying personnel.
